DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the seven lateral dividers must be shown or the feature(s) canceled from the claim(s). Currently, the drawings show six. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Art Unit: 3728

Claims 1,2,7, and 12 are objected to because of the following informalities:
claims 1 and 7 "form" should be "from", claim 2 and 7 "lip" should be "lid", and claim 12
"divers" should be "dividers." Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that
form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public
use or on sale in this country, more than one year prior to the date of application for patent in the United
States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Folsom,
US Patent 4,852,725.

Folsom discloses a container system for storing and presenting craft materials for
use comprising a housing having a rectangular bottom wall and a perimeter wall
extending upwardly from said bottom wall, a plurality of lateral dividers position at
approximately 45 degrees from vertical within the housing, a lid portion, and at least one
longitudinal divider.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all
obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set
forth in section 102 of this title, if the differences between the subject matter sought to be patented and
the prior art are such that the subject matter as a whole would have been obvious at the time the
invention was made to a person having ordinary skill in the art to which said subject matter pertains.
Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3728

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 5-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Folsom in view of De Witt.

As stated above, Folsom discloses the claimed features except for: a transparent housing, a specified size as is claimed in claims 6 and 7, or a specified material as is claimed in claim 10.

De Witt discloses a container comprising a transparent plastic material. It would have been obvious at the time of the invention to modify the container of Folsom with the transparent plastic of De Witt, as such a material allows a light weight durable construction which permits the contents of the container, while the container is closed.

With respect to the size requirements of claim 6 and 7, it would be obvious at the time of the invention to manufacture the container of Folsom in a variety of sizes to accommodate the needs of a variety of users, and different uses including plastic bead containers having a uniform size of 14 mm by 60 mm, which Folsom is inherently capable of accommodating. Also note column 3 lines 62-65. With respect to claim 11, Folsom discloses 7 lateral dividers and a pair of longitudinal dividers.
